Joan Elias Corona Gómez

Senior Software Engineer, Platform & Full Stack

Santiago, Dominican Republic | joaneliasc86@gmail.com | linkedin.com/in/joancorona | jcorona.me

Summary

Senior Software Engineer with 5+ years building production systems, from ERPs and e-commerce to banking platforms. I build the shared foundations product teams at Asociación Cibao rely on: integration SDKs, a React design system, centralized Azure DevOps pipelines, Azure infrastructure and microservices.

Experience

Senior Software Engineer (Consultant via Consultec-TI), Asociación Cibao de Ahorros y Préstamos — **Oct 2025 to Present**
Santiago, DR. Contract, hybrid

- Build integration libraries and SDKs for multiple frameworks, so product teams consume services consistently.
- Build a shared React design system with Storybook, used across web (Next.js) and mobile (Expo) apps.
- Design and maintain centralized CI/CD pipelines in Azure DevOps shared across teams.
- Manage Azure cloud infrastructure for internal and customer-facing services.
- Develop microservices and internal tools with Node.js, NestJS and TypeScript.

Frontend Developer (via Minnek Digital Studio), Your Store Wizards — **Mar 2024 to Oct 2025**
California, US. Contract, remote

- Built, extended and customized storefront themes, much of it on legacy codebases.
- Shipped predictive search, infinite scroll and custom widgets.
- Implemented custom checkout functionality tailored to each merchant's business rules.
- For other studio clients, built headless storefronts with Next.js and content sites with WordPress.

Full Stack Developer, Lubrigomas Corona SRL — **Dec 2022 to Mar 2024**
La Vega, DR. Part-time, on-site

- Built point-of-sale, inventory and accounting modules adapted to Dominican Republic tax requirements.
- Implemented multi-branch support with role-based access control (RBAC).
- Owned the full lifecycle: requirements with the business, development, deployment and support.

Full Stack Developer | Team Lead, Emedia Store — **Jan 2021 to Nov 2022**
La Vega, DR. Full-time

- Split the work, reviewed code and coordinated deliveries with the business owner.
- Built a modular ERP (inventory, sales and invoicing) with Express, TypeScript and PostgreSQL, plus the Next.js storefront.
- Implemented live customer chat with Socket.IO and containerized the services with Docker.

Freelance Web Developer — **Jan 2017 to Dec 2020**
Remote. Self-employed

- Delivered sites end to end and customized WordPress themes and plugins.
